

Alameda County, Alameda, CA

Landslide repair

Project Overview

Sustainable Group key personnel performed on-site construction services to repair a landslide below the county juvenile hall in San Leandro, CA.

Project Description

During the winter of 2012 and while performing regular maintenance of a storm water basin, the County of Alameda drained the basin over a hillside that caused a seventy five foot long by 35 foot wide slide area that also compromised an earthen access road.

Working with joint venture partner, Terraphase Engineering, Sustainable Group key personnel engineered a solution to compact the slide material at the toe of the slope and then build upon this structure with clean fill supplied by the County. This approach involved the skilled use of a long reach excavator to precisely place and compact the fill material along the face of the slope.

Sustainable Group completed this project on budget and on an accelerated timeline to ensure no further damage to the hillside occurred before the next rainy season.

About Sustainable Group

Headquartered in Moraga, California, Sustainable Group Inc. is a premier licensed General Contractor (CA #966993, HAZ) providing
