Project Description

This project provided all labor, materials, and equipment necessary to overlay and slurry seal the roadways and parking areas throughout the active Air Station to include work on the perimeter of the TARMAC and taxiway. Specific elements of work consisted of removal and replacement of existing damaged and deteriorated roadways and parking areas, pavement grinding and asphalt paving overlay in areas with adequate base paving, and slurry seal of certain roadway areas. Ancillary work also included removal and installation of new pavement striping and wheel stops. This site is an extremely busy air field and all facilities were fully occupied thus, Sustainable Group key personnel carefully coordinated and timed all work with air field operations to ensure the work was performed quickly, correctly, and with zero interference with the USCG.

This project was completed on time and with only a modest increase in the approved budget. This cost increase resulted from the discovery that the existing pavement section was much too thin to support the expected vehicle loads at the unit. A thicker pavement section which included the removal of additional subgrade, backfill and compaction of a suitable aggregate base, and placement of the thicker pavement

Removal of existing asphalt

Placement of geomembrane

Key Personnel Certifications

PE, LEED AP, PMP, CFM, QSD/
QSP

Sustainable Group is a Service
Disabled Veteran Owned Small
Business Corporation.

Paving operations in parking lot

Paving operations near TARMAC

section was recommended and accepted by all project stakeholders. To help offset these additional costs, other paved areas at the unit that were initially slated for repaving per the design, were deleted from the scope as they were already in good condition.

About Sustainable Group

Headquartered in Moraga, California, Sustainable Group Inc. is a premier licensed General Contractor (CA #966993, HAZ) providing general construction environmental remediation, demolition, civil site development, and marine construction services. Sustainable Group also offers Leadership in Energy and Environmental Design (LEED) expertise pertaining to renewable energy and sustainable sites, as well as overall facilities management consulting services. Sustainable Group key personnel have over 22 years of experience in successfully executing projects and performing expert facilities management for multiple Federal entities including the Department of Homeland Security, Department of Energy, Department of Defense, Department of Transportation, and the Army Corps of Engineers.

Let's Discuss Your Needs

Sustainable Group will become a highly valued and trusted resource that you'll rely upon to consistently provide expert, efficient and professional construction, remediation, demolition, LEED, and facility management consulting services.
